SEMIAUTOMATIC  
GAS KIT 2 gr

Phonica semiautomatic 2 groups is also available with GAS KIT: it is really important in Countries and places where electricity is very expensive or the electric power supply is not stable. Electricity is for the pump, for the groups solenoid valves and for the control board only: when the pressure reaches the parameter you settled, the power of the gas flame increases and takes the boiler pressure to the level you settled.

It guarantees the same temperature regularity performance of the electric Phonica.
